Notice of Fee Increase on January 1, 2003

If a reply to a "Notice of Allowance and Fee(s) Due" is filed in the Office on or after January 1, 2003, then the amount due will be higher than that set forth in the "Notice of Allowance and Fee(s) Due" since there will be an increase in fees effective on January 1, 2003. See Revision of Patent and Trademark Fees for Fiscal Year 2003; Final Rule, 67 Fed. Reg. 70847, 70849 (November 27, 2002).

The current fee schedule is accessible from: <http://www.uspto.gov/main/howtofees.htm>.

If the issue fee paid is the amount shown on the "Notice of Allowance and Fee(s) Due," but not the correct amount in view of the fee increase, a "Notice to Pay Balance of Issue Fee" will be mailed to applicant. In order to avoid processing delays associated with mailing of a "Notice to Pay Balance of Issue Fee," if the response to the Notice of Allowance and Fee(s) due form is to be filed on or after January 1, 2003 (or mailed with a certificate of mailing on or after January 1, 2003), the issue fee paid should be the fee that is required at the time the fee is paid. If the issue fee was previously paid, and the response to the "Notice of Allowance and Fee(s) Due" includes a request to apply a previously-paid issue fee to the issue fee now due, then the difference between the issue fee amount at the time the response is filed and the previously paid issue fee should be paid. See Manual of Patent Examining Procedure, Section 1308.01 (Eighth Edition, August 2001).

Questions relating to issue and publication fee payments should be directed to the Customer Service Center of the Office of Patent Publication at (703) 305-8283.

DETAILED ACTION

Allowable Subject Matter

Claims 1, 2, and 10 are allowable over the prior art of record.

Reasons for Allowance

The following is an examiner's statement of reasons for allowance:

1. Regarding claim 1 - The present invention is directed to a method for operating a telecommunications system having a switching facility and a plurality of subscriber channels over which data are transmitted in packet form using ISDN B-channels, wherein a concentrator receiving data on two or more B-channels concentrates the data onto one single outgoing channel directed to the Internet. Wherein two or more devices in the concentrator together control the feeding of the packets into one channel avoiding and controlling access contention. The closest prior art, Weinstein et al. (US 6,035,020), discloses a concentrator which interfaces with subscribers and a router which combines the concentrator outputs into a single channel directed to the Internet. However, Weinstein et al. neglects to disclose the subscribers are connected to the concentrator using ISDN B-channels and wherein two or more devices in the concentrator together control the feeding of the packets into one channel avoiding and controlling access

Art Unit: 2662

contention. Weinstein et al. either singularly or in combination, fail to anticipate or render the above limitations obvious.

2. Regarding claim 10 - The present invention is directed to a method for operating a telecommunications system having a switching facility and a plurality of subscriber channels over which data are transmitted in packet form using ISDN B-channels, wherein a concentrator receiving data on two or more B-channels concentrates the data onto one single outgoing channel directed to the Internet. Wherein the concentrator is configured to route data not to be concentrated to associated outgoing B-channels. The closest prior art, Weinstein et al. (US 6,035,020), discloses a concentrator which interfaces with subscribers and a router which combines the concentrator outputs into a single channel directed to the Internet. However, Weinstein et al. neglects to disclose the subscribers are connected to the concentrator using ISDN B-channels and wherein the concentrator is configured to route data not to be concentrated to associated outgoing B-channels. Weinstein et al. either singularly or in combination, fail to anticipate or render the above limitations obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Art Unit: 2662

Conclusion

Claims 1, 2, and 10 being allowable, **Prosecution On The Merits Is Closed** in this application.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

1. Liu et al. (US 6,349,096 B1) discloses a configurable digital subscriber loop access and end-to-end data and analog voice connection system.
2. Farese et al. (US 4,996,685) discloses a technique for dynamically changing an ISDN connection during a host session.
